## Summer School FEAL 2023 Call for Application

The European Cross-Border University (ACROSS) announces the Summer School “**Formal, Computational and Experimental Approaches in Linguistics 2023**” (FEAL 2023).

As a collaboration among the University of Nova Gorica (Slovenia), University of Craiova (Romania), and University of Udine (Italy), FEAL 2023 represents an interdisciplinary training opportunity for BA, MA and PhD students from linguistics, applied mathematics, psychology, and neuroscience.

The FEAL 2023 summer school focuses on different research topics addressed in contemporary linguistics through two main approaches: a formal one, offered by theoretical linguists and mathematicians, and an experimental one, covered by cognitive linguists, statisticians and computer scientists.

The summer school will take place in Chemnitz (Germany) from 31/07/2023 to 04/08/2023.

Students from ACROSS Universities will be offered a scholarship to cover part of their expenses (for successful attendance of the whole period), up to a **maximum of 15 participants**.

The exact scholarship amount varies between € 480,00 and € 550,00 and depends on the country of the sending institution (details on the FEAL 2023 website).

Participation of students from other universities is possible but no funding can be granted; remote participation can be an alternative. **There is no fee for attendance.**

Students will be provided with a certificate of participation which could be used for the recognition of a maximum of 2 ECTS (based on the rules of their own institutions).

All sessions will be held in English.

We invite interested students to send their applications, including a motivation letter, a short CV, and a transcript of records at the email address:

[feal2023.summer@gmail.com](mailto:feal2023.summer@gmail.com).

Deadline for application: **06/07/2023**
